

ERIC TRACY: My name is Eric Tracy, E-r-i-c

OCT 04 2001

552298

16 T-r-a-c-y. I'm a student at the University of Nevada,
17 Reno, and I didn't really have anything prepared, but I
18 just wanted to say that I'm opposed to this. You know,
19 I'll just restate what other people have said.

20 The science isn't there to back it up. I
21 mean, the reason that the DOE has scheduled this so
22 quickly should be obvious. I mean, they just -- they
23 want to, you know, schedule it quickly so no one will be
24 able to come.

25 AUDIENCE MEMBER: Look at the size of the

125

1 room.

2 ERIC TRACY: Yeah, it's a small room. This
3 is going to affect over a million people, and they --
4 sorry, I apologize -- a million people in Nevada and who
5 knows how many people who are on the routes, and, again,
6 you know, this doesn't just affect, you know, Nevada or
7 just -- it affects the whole country. You know, it's --
8 they're doing -- the DOE, you know, under the influence
9 of, you know, nuclear power companies, they're just doing
10 what's politically expedient, just put it in a place that
11 doesn't have the -- you know, can't oppose it politically

552298

12 very well.

13 You know, just -- it's just wrong, you know,

14 that -- it's just wrong. Thank you.
